

Soybean Foliar Programs

Can Grow Crop Solutions specializes in creating effective and complete programs to maximize and maintain plant health. Our combinations of nutrients and bio stimulants, applied at targeted growth stages, capture yield potential. We strive to alleviate the plant stress caused by herbicide applications and weather extremes to allow crops to power through to yield.

Perc n Phos-(4-20-0) significant amounts of organically complexed nutrients, designed to increase crop energy and reduce stress.

Boron-for increased flower initiation and retention and more numerous pods per node.

CropKarb-(8-0-18) a finishing spray that directs the plants' energy flow toward even pod fill and sizing of individual beans.

Custom Solutions.

Proven Results.
