

ReStore™ is intended for use as a seed treatment to optimize crops establishment and vigor.

Guaranteed Minimum Analysis

Azospirillum brasilense	1 x10 ⁴ CFU/mL
Bacillus amyloliquefaciens	1 x10 ⁷ CFU/mL
Bacillus licheniformis	1x10 ⁷ CFU/mL
Pseudomonas putida	1 x10 ⁷ CFU/mL

General Information: Use ReStore™ to support germination and optimize soil conditions for root development. ReStore™ is a seed treatment solution containing a diverse team of naturally derived beneficial microorganisms without genetic modifications. ReStore™ will feed and enhance the community of beneficial microbes in the rhizosphere supporting conditions for crop establishment. ReStore™ harnesses the power of microorganisms to fix nitrogen and solubilize and release insoluble forms of phosphate making them available for uptake by the plants.

Manufactured By: CanGrow Crop Solutions

Mixing Instructions: For best results, shake well before use. If combining with other products avoid having them mixed together for extended periods of time. Some chemicals can be detrimental to the microbes. If mixing with other products, it is best to mix right before application. Always perform a jar test to ensure compatibility. For more information on mix compatibility with other seed treatment products please contact your CanGrow dealer or a professional crop consultant.

Direction of Use:

Use 200 - 265 mL of ReStore™ per 100 kg of seed. Will be beneficial for use with any seed that can be treated. Usage rates may vary depending on the other ingredients used to treat the seeds. Please consult your CanGrow dealer for more information on the use of the product.

Storage & Handling: Please store at room temperature or below. Keep product out of direct sunlight. **DO NOT FREEZE.**

Net Weight:

Volume: 10.0 L
Weight: 10.0 kg
Density: 1.01 kg/L

CAUTION:
