

Stream band

Crops are increasingly responsive to sulfur (S) due to lower industrial emissions, low S availability in cold conditions, and higher yields that increase S demand. When sulfur is added to nitrogen, N utilization and efficiency improve and yields are maximized.

N with S for optimum nutrient efficiency and convenience.

Benefits

- Power Strip provides a convenient one-product solution for your wheat NS needs with maximum N use efficiency and reduced risk of N losses.
- Contains 100% plant-available sulfate sulfur.
- Contains BioLiNE Gold fulvic acid, for maximum uptake and efficiency.
- Can be customized with additional macro and micronutrients.

Application

- Stream band 20-40 gal/ac for corn, wheat, or spring cereals.

Standard blends:

26-0-0 2S

24-0-0 3S

20-5-0 3S

- Custom blends available.
