AGRONOMIC NEED

CANGROW SOLUTIONS

Edible Bean Solutions

Start Strong

PowerBand stream NS 20-5-0-3S or 24-0-0 3S or 26-0-0 2S

NS solutions that support nitrogen and sulfur plant needs. 100% plant available S. Contains BioLiNE Gold fulvic acid for enhanced use efficiency, nitrogen stabilization and stress support. Can apply with pre-emerge herbicides.

Seed Coat hopper treatment

Replaces talc/graphite plus provides nutritional component (2S 2Zn 2Mn) and vital amino acid and enzyme building blocks to promote early season biological activity around the seed and optimum early root development.

ReStore seed treatment

Team of multiple naturally occurring microbes that promote germination, provide more robust root mass and plant vigour. Microbes also offer biofertility to increase the availability of nutrients in the soil.

PowerStart in-furrow 6-21-3 2S 3-10-10 3.5S

Neutral starter that lowers pH in the root zone to release additional tied up nutrients. Contains BioLiNE Gold fulvic acid for stress tolerance/increased nutrient uptake and CanGrow actives for optimum seed establishment. Additional micros (Zn, Mg, Mn) and stress relievers can be included.

ReNew in-furrow

Diverse team of beneficial microbes for plant enhancement capabilities including vitamin/hormone production, nutrient releasers, and stress reducers.

Grow Strong

NitroKMag side-dress/Y-drop

NKMg solutions that provide stabilized amine N for increased uptake and maximum efficiency. Potassium supports late season pod fill and magnesium optimizes photosynthesis. BioLiNE Gold fulvic for enhanced use efficiency. Optional addition of Zn, B, Mn for plant support.

UnLeash bio-fertility & residue manager

Teams of organisms that release tied-up nutrients from soil and residue. Compatible with crop protection products such as herbicides or fungicides.

Max Impact foliar 4-20-0 0.9S 0.2Mg 0.6Zn 0.4Mn 0.2Fe 0.1Cu

Built to increase plant energy and supply strong base of micros going into reproductive phases to keep more flowers and develop more seeds per pod.

Manganese Plus **Boron Plus** **CoMo** foliar

Full compliment of highly effective micros to alleviate nutrient deficiencies or address agronomic concerns including reducing stress.

Finish Strong

CropKarb foliar 8-0-18 0.375B

Apply at heavy blooming, sizing or bulking to increase seed size and weight.

Plus Up Partner Solutions PLUS UP PARTNER ↑

BioLiNE Gold starter-side-dress Y-drop-foliar

Pure, highly-concentrated fulvic acid that reduces plant stress and increases nutrient use efficiency. Compatible with other products.
