

CanGrow ReCover™ SR is intended to repair and promote revegetation of contaminated soil.

Guaranteed Minimum Analysis

Bacillus licheniformis	1 x10 ⁷ CFU/mL
Bacillus subtilis	1 x10 ⁷ CFU/mL
Rhodopseudomonas palustris	1 x10 ⁷ CFU/mL

General Information: CanGrow ReCover™ Soil Rejuvenation is a combination of naturally occurring beneficial microorganisms that were specifically selected for their ability to breakdown chemical and hydrocarbon contamination. Use this product to degrade aliphatic hydrocarbons, PAH's (Polycyclic Aromatic Hydrocarbons), volatile aromatic hydrocarbons, chlorinated hydrocarbons, pesticides, herbicides, phenol and terpene related compounds. By deploying this product, you can realize the power of naturally occurring beneficial microorganisms and reclaim the health and potential of the soil.

Mixing Instructions: For best results, shake well before use. If combining with other products avoid having them mixed together for extended periods of time. Some chemicals can be detrimental to the microbes. If mixing with other products, it is best to mix right before application. Always perform a jar test to ensure compatibility.

Direction of Use:

For general remediation and maintenance, apply 2.5 L/Ha (1 L/acre) of CanGrow ReCover™ Soil Rejuvenation.

For industrial contamination, consult with your CanGrow sales rep for specific use cases.

The estimated timeline to full remediation depends on multiple factors such as the type, level, depth of contamination, and decontamination level to be achieved.

Storage & Handling: Please store at room temperature or below. Keep product out of direct sunlight. **DO NOT FREEZE.**

Net Weight:

Volume: 10.0 L (2.5 USG)

Weight: 10.0 kg (22.0 lbs)

Density: 1.01 kg/L (8.8 lbs/USG)

CAUTION:

KEEP OUT OF REACH OF CHILDREN.
