Start Strong

Seed Coat (hopper treatment): Replaces talc/graphite and provides nutritional components (2S, 2Zn, 2Mn) and vital amino acid and enzyme-building blocks to promote early-season biological activity around the seed and optimal early root development.

PowerStart (in-furrow): 6-21-3 2S - Neutral starter that lowers pH in the root zone to release tied-up soil nutrients. Contains BioLiNE Gold and Can Grow actives for stress tolerance/increased nutrient uptake. Can be customized with additional micros (Zn, Mg, Mn) and stress relievers for poor conditions.

PowerBand (2x2): NPS or NPKS neutral solutions that lower pH in the 2x2 zone to release additional tied-up nutrients. Contains BioLiNE Gold fulvic acid for increased nutrient uptake. Can add Can Grow actives, micronutrients and stress relievers.

Grow Strong

UnLeash (bio-fertility & residue manager): The best of a microbial bio-fertility and residue manager/recycler all in one. Teams of organisms that release tied-up nutrients from soil and residue.

NitroK Mag (side-dress / Y-drop): NKMg solutions provide stabilized amine N for increased uptake and maximum efficiency. Potassium supports late-season corn needs, and magnesium optimizes photosynthesis. BioLiNE Gold fulvic acid for enhanced use efficiency. Optional addition of Zn, B, and Mn for plant support.

Max Impact (foliar): 4-20-0 0.9S, 0.2Mg, 0.6Zn, 0.4Mn, 0.2Fe, 0.1Cu - Built to increase plant energy and supply multiple micronutrients to reduce field variability. Compatible with herbicides or fungicides.

5% Boron / N-Sure (foliar): Can Grow has a full complement of highly effective micros to alleviate nutrient deficiencies.

Finish Strong

Nexus 1 / Nexus 2 (foliar): To increase the movement of carbohydrates from the source (plant, roots) to the sink (ear) for faster, denser fill resulting in yield and quality increases.

Plus Up Partner Solutions

Corn Power Pack (plus-up partner): A combination of Zn and BioLiNE fulvic acid that can be added to non-Can Grow corn starters for additional nutrient support and higher nutrient efficiency.

BioLiNE Gold (starter / 2x2 / foliar): Pure, highly concentrated fulvic acid that reduces plant stress and increases nutrient use efficiency. Compatible with other products.
