Start Strong

Seed Coat (hopper treatment): Replaces talc/graphite and provides nutritional components (2S, 2Zn, 2Mn) and vital amino acid and enzyme-building blocks to promote early-season biological activity around the seed and optimal early root development.

PowerStart (in-furrow): 6-21-3 2S - Neutral starter that lowers pH in the root zone to release tied-up soil nutrients. Contains BioLiNE Gold and Can Grow actives for stress tolerance/increased nutrient uptake. Can be customized with additional micros (Zn, Mg, Mn) and stress relievers for poor conditions.

ReStore (seed treatment): Teams of naturally occurring microbes that promote germination, robust root mass and plant vigour. Microbes also offer bio-fertility by increasing the availability of soil nutrients.

ReNew (in-furrow bio-fertility): Diverse teams of beneficial microbes that provide plant enhancement, including vitamin/hormone production, nutrient releasers, and stress reducers.

Grow Strong

UnLeash (bio-fertility & residue manager): The best of a microbial bio-fertility and residue manager/recycler all in one. Teams of organisms that release tied-up nutrients from soil and residue. Can be applied with crop protection products such as herbicides or fungicides.

Max Impact (foliar): 4-20-0 0.9S, 0.2Mg, 0.6Zn, 0.4Mn, 0.2Fe, 0.1Cu - Built to increase plant energy and supply multiple micronutrients to reduce field variability. Compatible with herbicides or fungicides.

5% Boron / 10% Manganese / Premium MoCo (foliar): Full complement of highly effective micros to alleviate nutrient deficiencies or address agronomic concerns, including reducing herbicide stress or abiotic stress (too hot, dry, or wet) by re-invigorating roots or nodules.

Finish Strong

CropKarb (foliar): 8-0-18 0.375B - Apply at heavy blooming, sizing, or bulking to increase seed size and weight.

Plus Up Partner Solutions

Soy Power Pack (plus-up partner): A combination of Zn, Mn, and BioLiNE fulvic acid that can be added to non-Can Grow soybean starters for additional nutrient support and higher nutrient efficiency.

BioLiNE Gold (starter / 2x2 / foliar): Pure, highly concentrated fulvic acid that reduces plant stress and increases nutrient use efficiency. Compatible with other products.
